

Chapter 6: Word Processing

Word processing involves creating, editing, and formatting text documents. It has replaced traditional handwriting and typing due to its efficiency and advanced features.

6.1 Key Features of Word Processing

- **Editing:** Easily modify text without re-typing.
- **Formatting:** Change font styles, sizes, colors, and alignments.
- **Spell Check:** Automatically identify and correct grammar/spelling errors.
- **Mail Merge:** Create multiple documents (like letters) with personalized data.
- **Objects:** Insert images, charts, and tables.

6.2 Microsoft Word Interface (Ribbon)

The Ribbon is the primary interface in Word 2010. It is divided into **Tabs** (Home, Insert, Page Layout, etc.) and **Groups**.

- **Title Bar:** Displays the document name.
- **Quick Access Toolbar:** Shortcuts for Save, Undo, and Redo.
- **Status Bar:** Shows page count, word count, and zoom slider.

6.3 Essential Shortcut Keys

Action	Shortcut Key
New Document	Ctrl + N
Save Document	Ctrl + S
Open Document	Ctrl + O

Copy Text	Ctrl + C
Paste Text	Ctrl + V
Cut Text	Ctrl + X
Select All	Ctrl + A
Undo Action	Ctrl + Z

6.4 Mail Merge

Mail Merge is a powerful tool used to produce multiple documents from a single template and a data source (like a list of names and addresses). It is ideal for invitations, certificates, and mass mailings.

6.5 Formatting Tools

Common tools found in the Home Tab:

- **Bold (Ctrl+B), Italic (Ctrl+I), Underline (Ctrl+U)**
- **Subscript/Superscript:** For mathematical or chemical formulas.
- **Alignments:** Left, Right, Center, and Justified.
- **Bullets and Numbering:** For creating lists.
